

Partners / Contributors

From the inception of Institut Pasteur du Laos many governments, institutions, agencies, companies, individuals brought their contributions and allowed this Institute to be established and grow.

We wish to express our deep gratitude to them.

Their names are engraved in a marble slab in the lobby of Institut Pasteur du Laos in order to pay tribute to them and in order that the next generations of scientists who will work in this Institute do not forget that it is also thanks to the first donors.
